

I am disturbed by the actions of Sinclair Broadcasting to order their stations to air an anti-Kerry documentary this close to the presidential election. This is unfair to present a biased view of one of the candidates with no chance of rebuttal. We are facing so many present issues, why are we rehashing something that happened so long ago. It looks like an attempt to divert attention away from the present.

Sinclair uses the public airwaves, and is suppose to serve the public interest. Is this just an attempt by another large corporation looking out for what is good for them. You have a responsibility to the public and to our democracy that should keep honest companies from trying to interfere with our democratic process.

I have always been a supporter of journalism as a necessary tool in our democracy and argued against those who decry the profession. But your actions are making me understand what the dangers of irresponsible journalism are. Please rethink your decision.  
Thank you.
